Notes to Financial Statement**1. Summary of Significant Accounting Policies and Going Concern****A. Accounting Practices**

The financial statements of Blue Cross and Blue Shield of New Mexico Insurance Company (Company) are presented in conformity with accounting practices and procedures of the National Association of Insurance Commissioners as prescribed or permitted by the New Mexico Office of Superintendent of Insurance (OSI).

The New Mexico (OSI) recognizes only statutory practices prescribed or permitted by the State of New Mexico for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under New Mexico Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual (SAP), has been adopted as a component of prescribed or permitted practices by the State of New Mexico.

The Company did not have any prescribed or permitted practice exceptions for the six months ending June 30, 2021 and 2020 or the year ended December 31, 2020.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could affect the amounts reported and disclosed therein such that actual differ from management's estimates.

C. Accounting Policy

The Company did not have any insurance operations in 2021 or 2020. The only activities were related to investments, administrative services and taxes.

Investments

Investments are stated at values prescribed or permitted by the NAIC as follows:

(1) No Significant Change

(2) Bonds not backed by other loans are stated at amortized cost using the interest rate method, except for those bonds with an NAIC 3-6 designation, which are carried at the lower of amortized cost or fair value. Fair values are calculated based on market prices provided by the custodian. If there are no market prices provided by the custodian, the fair value is calculated by the Company in conjunction with its investment advisors.

D. Going Concern

In connection with preparing financial statements for each annual and interim reporting period, management evaluates whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are available to be issued. There are no conditions or events that raise substantial doubt about the Company's ability to continue as a going concern.

20. Fair Value Measurements

- A. Fair Value Measurement Techniques and Inputs

The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy that gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest-level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). There were no changes in valuation techniques from the prior period.

The levels of the fair value hierarchy as defined by SSAP No. 100R, *Fair Value*, are as follows:

Level Input	Definition
<i>Level 1 –</i>	Inputs are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.
<i>Level 2 –</i>	Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads, and yield curves.

Notes to Financial Statement

<i>Level 3 –</i>	Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company’s best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.
<i>Net Asset Value (NAV)-</i>	NAV per share is the amount of net assets attributable to each share of capital stock (other than senior equity securities, that is, preferred stock) outstanding at the close of the period. It excludes the effects of assuming conversion of outstanding convertible securities, whether or not their conversion would have a diluting effect.

In order to be classified as Level 1 unadjusted quoted market prices for identical assets or liabilities in active markets must be available. Fair values based on quoted prices for similar assets in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument (e.g., market interest rates and volatilities, spreads, yield curves, reported trades, broker/dealer quotes, bids, and offers) are classified as Level 2. Fair values not determined using the methods applicable to Levels 1 and 2, such as using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing) or other methods, models, and assumptions that management believes market participants would use to determine a current transaction price, are assigned to Level 3.

The Company’s invested assets subject to this disclosure are priced principally through independent pricing services that obtain prices from reputable pricing vendors in the marketplace. Through contracted custodians and software vendors, the Company obtains prices for all securities and continually monitors and reviews the external pricing sources while actively attempting to resolve any pricing issues that may arise. These service providers use a market approach to find pricing of similar financial instruments.

These valuation techniques involve some level of management estimation and judgment, which become significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model, or input used.

- (1) The following table summarizes fair value measurements by level as of June 30, 2021 for assets carried at fair value:

Description for each class of asset	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
